

THE INTEGRATED LEADER

INTEGRATED LEADERSHIP

Coaching invites integration. We can't fix what we don't see. The coach introduces key self-awareness assessments to get a base-line to solidify growth markers. Below is the pathway to integration.

SELF AWARENESS

Coaching invites new awareness of strengths, motivations, and integration opportunities. This process develops new leadership capacities.

This promotes healthy:

- Growth opportunities
- Development of their gifts and strengths
- Expansion of emotional intelligence

SELF GENERATION

As self-awareness expands, the leader begins to self-generate ways that foster psychological safety and shape a positive culture.

This promotes healthy:

- Self-care
- Executive presence
- Communication style
- Relationships

SUSTAINABLE SUCCESS

Integrated leaders expand their capacity to sustain success long term. This allows them to:

- Inspire the company culture
- Envision career progression
- Act in Integratively Intelligent ways
- Provide psychological safety
- Invite cohesive teamwork
